

We have a house in Sayre, Pennsylvania, and one in Elmira, NY.

We have been carried in what appears to be illegal tele-conferencing by Time-Warner Cable, and General Electric for years-

and I have made video tapes showing this;

the people on the TV screen over the years reacted to things we did in our living room, like loud noises.

This is the reason I feel that we are being harmed now by those same persons (including Warner Brothers, Universal Studios, and TV networks,

as well as other people that were involved, and do not want to be ever charged with the Invasion of Privacy.

The US has let this go on, and so has endangered our safety, and the Warner Brothers group appears to have hired/bribed neighbors to involve themselves in harming us. Look at the web site Eating IT.com which is a movie site, where they sell "Butt Shaker" amplifiers- they are selling equipment to harm people right out in the open, with my husband's last name, and mine, which they are harming us, in the brains.

Mr. Schubal Bowman, of 404 Olive Street, Sayre, PA appears to have a hard wired access underground into our home,

and had access with keys and construction before we moved in.

In addition he uses some air method of damage that appears to be batteries which he sends electrical energy out into the air, into our house.

He appears to be source for Broadband access of radiology networks into our home at night, and they have created pulsed damage of the brains of each living creature (including pets) in the house.

I have had a recent CAT/CT Scan which I have a copy of that shows damage has been done, yet I have NEVER had any head injury, disease, or damage of any kind. All damage being created is from this abusive assault, which your FCC is allowing to be anonymous.

We have cats which show metal welding type heating has closed off nerve endings and capillaries so that no bleeding takes place in areas being harmed. No blood has come out of a cut in the area-like empty skin. I feel that is what they are doing in the brain areas also, so that the blood is out of the way. Some of the soft tissue areas around the bone of my skull have become slightly sunken from their assault. I would not have known this could be possible- they are attacking us.

Increasing damage has been being leveraged each day and overnights; in a situation that appears to include piped in air control (same sources through turquoise pipes I watched them put into the yard) to put us to sleep,

and radiology networking to actually try to remodel our neural networks -brains, as well as other physical damage.

I have the evidence of this shown in physical damage,

and we appear to have no way to protect ourselves, or our pet animals, from what has been virtually

anonymous, unnamed vicious attacks.

For the FCC this is just another complaint, but to us and the people of the United States who Mr. Bowman and his bribing entities may just decide to harm anonymously, it is the most important report you may receive this year. I have written many people this year about this;

and NO civilian should have to go through what we have been forced to endure- unending American "terrorist attack" which is aimed by vicious predator businesses and individuals trying to sneakily get out of responsibility for damage they have inflicted- we are just living in our houses-We need protection.

The police do not provide it, and do not know how to advise us to test for what is happening. If anything they patronize me for reporting this!

Oscilloscopes are very expensive and very complicated.

You are leaving damage creating stalkers free to roam houses by computer networks and create physical harm of all types.

I am afraid to go to sleep tonight, and find that Mr. Bowman and his radiology broadband network will decide to do a little more brain damage for their own enablement, to my elderly husband, to my own brain, to our two cats, and to our tiny parakeet; we all are subject to the same tortures.

These monster persons are virtually unidentified by the FCC. I am going to try to purchase a Frequency meter, but the TriField meter shows electrical attacks in the range of over 100 on the scale OFTEN.

(we do not have broadband, we have modem- but broadband is often taking over through the LAN and removing our modem)

What are we supposed to do to protect ourselves in our own homes? You are not necessarily supposed to care, although it would be human of you, but you are supposed to protect all of us, not just your big deal money spending vicious persons who you are enabling to harm all - what do we do???? Just become increasingly brain and physically damaged so these jerks can get away with harming whoever they want? 12/17/2006 laureldavies@peoplepc.com

There are several radiology networks including Time-Warner Broadband, GE, Guthrie Healthcare who appear to be beating us up.
